Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 14-19 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. It is not clear which class of statutory invention "layers" fall into. Clarification is requested.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 20 is rejected under 35 U.S.C. 102(b) as being anticipated by the acknowledged prior art cited on the 1449 and also in the 892 of record here.

These compounds are known wherein a new process for making or a purer product thereof does not necessarily render that product new and unobvious, absent maybe some unexpected result or extraordinary uniqueness about the compound. In this case, neither of the latter is seen. The instant compounds are not seen to be patentably distinct from those of the prior art.

Allowable Subject Matter
